

A Multimodal Study of Challenges Using Rust

Context

- Often, usability studies are a stepping stone to refining a system
- Often not publishable on their own
 - This is a workshop paper

Strengths of Think-Aloud

Weaknesses of Think-Aloud

Task Design

- In this work, we used class homework assignments
 - Pro: external validity (sort of; class context is artificial too)
 - Con: missed opportunity?
- What would you have done?

Next Steps

- What challenges are worth addressing?
- What should we do?
- What did the paper miss?
